Strategic Profit Recovery

U.S. Patent Number 7,908,188

LAVANTE RECOVERY™

Lavante's unique, on-demand recovery solution leverages the power of our supplier network and the communication power of Lavante *Connect™* to identify new opportunities and to maximize recoveries across *all* ranks of our clients' supplier populations. Built with patented technology, this powerful recovery application can serve as a standalone service or as a complement to the traditional recovery model by applying in-depth supplier insights to historical AP records. An additional benefit is that Lavante Recovery continuously cleanses your supplier records and drives root cause analysis to prevent future payment discrepancies and profit loss. Because our solution is on-demand, you get instant results and a real-time view of your audit activity and progress.

Comprehensive, In-Depth Recovery

The communication power of the Lavante *Connect™* supplier portal enables us to do a deeper, more comprehensive review than traditional recovery methods. By partnering with you and leveraging automation, we communicate with the largest possible number of suppliers—not simply the top percentage. This results in more recoveries, faster.

Retain Control and Transparency

Lavante enables you to manage and monitor all aspects of your audit in real-time, while retaining control of the data, communication with suppliers, and decisions about accepting or denying claims. Real-time management reporting begins on the first day of your audit, granting you full access to all communications activity, supplier compliance, and recovery progress.

Perform Real-Time Root Cause Analysis and Avoid Transaction Discrepancies

Lavante lets you work together with suppliers to identify the sources and causes of transaction errors. Lavante cleans supplier information and confirms supplier relationships to maintain accurate supplier data. Our reporting suite provides details and insights into root causes of problems and facilitates permanent solutions.

Dynamic Reporting Provides Management Visibility

Lavante's comprehensive suite of dynamic, interactive management reports enables you to understand and manage your audit. User-defined reporting tools allow you to configure data to gain visibility and quickly identify and resolve issues.

It's Fast & Easy

Lavante *Recovery™* is delivered as an on-demand, SaaS-based application so it's easy to get started. You don't have to purchase servers, deploy a new application, host on-site personnel, or support new IT infrastructure. All results and recoveries are delivered in an intuitive point-and-click interface with real-time, dynamic access that will enable your department to enjoy immediate benefits. Deployment is fast, so you recover credits quickly.

Patented Technology & Processes

Lavante *Recovery™* is built on patented technology and processes. This unique patent covers Lavante's ground-breaking recovery audit processes, technology and software application which have fundamentally changed the recovery auditing industry.

"Lavante's recovery technology is a vast improvement over the current state of the recovery industry. It is hard to imagine performing a third party audit without the benefit of Lavante's online interface. They not only recover a large sum of lost revenue, but they help uncover trouble areas within our vast vendor population."
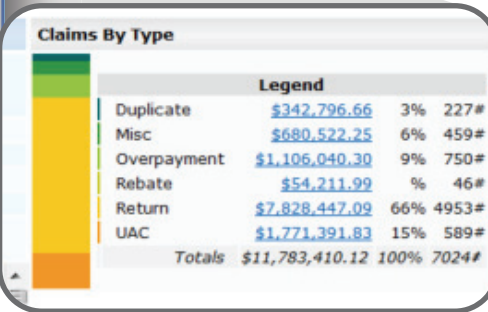

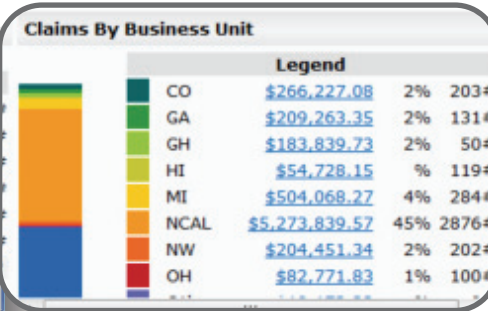

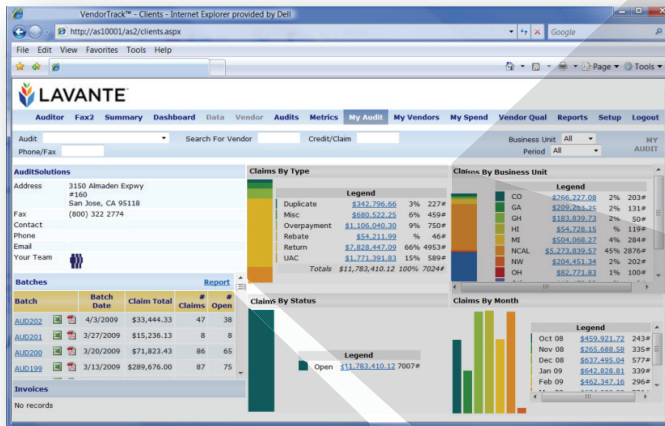

AP Manager Boise Inc.

LAVANTE®

Simplified Delivery

Recoveries are delivered through our online web portal, accompanied by signed, supplier-supported documentation. Our interactive web interface enables a real-time download of validated claims.

Claims by Business Unit

Lavante can track the originating department/location of all reported claims

Claims by Type

Lavante allows root cause analysis across all reported claims for fast corrective action

Automates Processing

Lavante verifies claims and delivers electronic batches and backup documentation for immediate review
